November 2013

TCS Preschoolers Love “BEE”-ing Entomologists!

At the end of our Insect Unit, the Truro Central School Preschool class had some visitors who have a head, thorax, abdomen, six legs, two antennae, and a pair of wings.

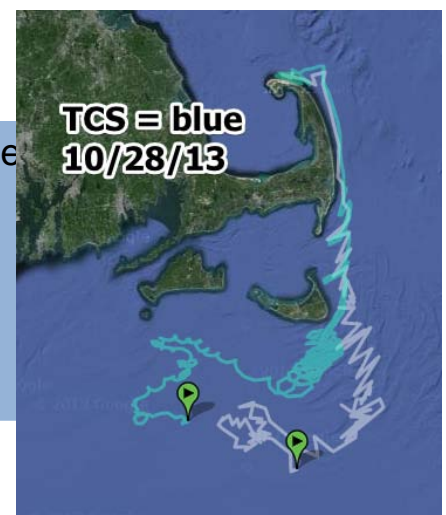

Ms. Eliza, a preschool paraprofessional, brought an observation hive full of honey bees into the classroom. We observed the honeybees' behavior in the hive and read some books about bees to learn more. Ms. Eliza also brought an empty super (one section of the hive) and her beekeeper's suit and equipment so we could try it out and pretend to be beekeepers.

It was fun and interesting to learn about bees and how they make honey. Apples dipped in honey for snack taste great!

Don't forget! You can still follow the course of our ocean surface current drifter. Go to www.truromass.org/TCSDrifter.htm and click on "Follow the Track".

Here's our location as of 10/28/13:

Throughout November, TCS will be holding our 17th Annual Food Drive to benefit the Truro Food Pantry. It is remarkable to see the generosity exhibited by TCS students. They want to support those in our community who may be in need of a helping hand at this time of the year.

Children in grades Pre K-6 are asked to bring in a non-perishable food item once a week for the month of November. Most students look forward to this food drive. Thanks to the continued generosity of our school community, TCS supplied **36 full bags** of groceries to the Truro Food Pantry in 2012. This enabled the pantry in providing fresh produce to supplement the non perishable items for families and children at Thanksgiving.

If you are interested in helping, you can drop off non-perishable items to the TCS Main Office and we will deliver them to the Truro Food Pantry. Thank you!

17th Annual T.C.S. FOOD DRIVE

T.C.S. Recycles!

The Sixth Grade class will be (once again) coordinating this year's recycling program at Truro Central School.

Each room has one or two recycling bins which get traded out for an empty bin every week. If a room is smaller, and therefore uses less paper and bottles, it has only one container, whereas larger rooms such as the art room have two. By doing this, the school hopes this will help the environment, and prevent global warming.
