

All About Mushrooms, Sustainable CAPE's annual Children's Art Exhibit, Truro Public Library, Feb. 8, 3-5pm

PLEASE JOIN US on Friday, February 8 from 3-5pm at the opening reception of Sustainable CAPE's annual Children's Community Garden Art Exhibition at the Truro Public Library. This year's theme, *All About Mushrooms*, is colorful, varied and fun... the young artists' gift to us all during the snowy month of February.

Each annual theme's learning is shared through education boards displayed at the show. For instance, did you know mushrooms have been used to clean up toxic waste sites? Mushrooms have the ability to break down more than just soil - they've been used to clean up oil, microbes, plastic, heavy metals and chemicals.

This process is called mycoremediation!

Come enjoy the children's artwork, learn more amazing mushroom facts, and have a wonderful time with Sustainable CAPE and a whole new generation of artists at the Truro Public Library!

All About Mushrooms, Sustainable CAPE's annual Children's Art Exhibit, Truro Public Library, Friday, Feb. 8, 3-5pm

The Sustainable CAPE's Children's Garden art show is a perennial favorite, traveling from the Truro Public Library to the Local Scoop in Orleans, the Barnstable County Fair and then the Truro Agricultural Fair. All told, the children's work and learning is viewed by more than 15,000 people.
