MICROCHIPPING CLINIC

Ark Angel Animal Hospital, 1532 Route 6, Wellfleet, MA

Thurs April 24 9am to 6pm

Fri April 25 9am to 6pm

Sat April 9am to 1pm.

We will be doing microchip implantation for \$40 (normal price is \$52.00).

Since only 58% of microchipped pets get registered, we are also offering to register your pet in the national online database during the appointment (an additional \$20.00 one time registration fee is required, which is paid directly to the national registry which keeps your pet's information for life).

WHY IS MICROCHIPPING IMPORTANT?

Micro-chipping your pets will greatly increase your pet's chance of returning home. On average 10 million dogs and cats are lost each year. The chance of a dog being returned if he or she is not microchipped is only 22%. For a lost cat the chance of being reunited with their owners without a microchip is only 2%.
